

# SCIENCE OF PSYCHEDELICS IN PRACTICE

BY NEPOPULARNA PSIHOLOGIJA

Second multidisciplinary conference  
in Zagreb, Croatia

// **05** // **APRIL** // **2025** //

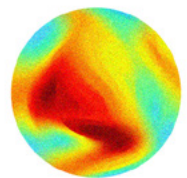

Following the great success of the first event, we are **proudly announcing the second multidisciplinary conference “Science of Psychedelics in Practice”**, which will take place on **April 5th, 2025, at WESPA Spaces** (Heinzlova St. 60, Zagreb).

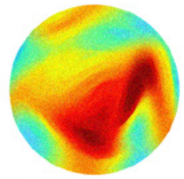

Last year's conference brought together a large number of participants, including students, psychologists, doctors, and other mental health professionals, **with the number of applications exceeding our expectations**. Due to the high interest, we relocated the event to a larger venue and provided a streaming service for those unable to participate in person.

**We received extensive media coverage**, with articles in mainstream newspapers and portals (e.g. Jutarnji List, Večernji List, H-alter, srednja.hr and other portals), furthermore confirming the significance and interest in this topic in Croatia.

## FIRST CONFERENCE

// CONFIRMATION OF TOPIC'S  
IMPORTANCE //

# NEW // AND IMPROVED // EDITION // PROGRAM //

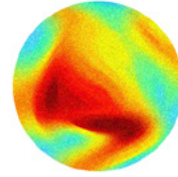

**This year we are preparing an even more comprehensive program:**

**/ 1 / Two stages** with parallel lectures conducted by experts in fields of psychiatry, psychology, medicine, and related sciences.

**/ 2 / An international aspect,** with presentations held both in English and Croatian.

**/ 3 / Both in-person and online participation,** making the content accessible to a wider audience regardless of location.

**/ 4 / A roundtable discussion** focused on the application of psychedelics in therapeutic practices and research in the region.

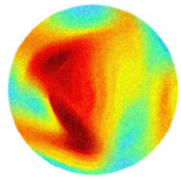

## CONFERENCE GOAL

**This conference aims to raise awareness about scientific research and therapeutic application of psychedelics** such as LSD, psilocybin and MDMA, which show great potential in treating mental disorders such as depression, anxiety, PTSD, as well as addiction. Unfortunately, stigma around this topic and criminalization of psychedelics have long delayed research in this field.

**This conference contributes to educating the public and professionals about the latest scientific findings and dismantling myths** associated with psychoactive substances. At the same time, we continue the dialogue in a society where a significant percentage of people suffer from PTSD, depression and other disorders, with **the ultimate goal of reducing suffering and improving the quality of life of individuals in question and society as a whole.**

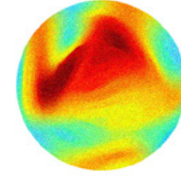

# WHO IS THIS CONFERENCE FOR?

The conference is intended for **psychologists, psychiatrists and other doctors, therapists, researchers, students, and anyone interested in psychedelics** and their medical and therapeutic applications.

It offers a unique **opportunity for networking, exchanging knowledge and ideas, and gaining new insights** into one of today's most exciting and promising research fields.

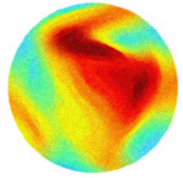

## ABOUT US

The conference is organized by the non-profit organization **Nepopularna psihologija (Unpopular psychology)**, which has been actively promoting psychology and related sciences over the past six years through popular science articles, lectures, workshops, and public events.

Nepopularna's team of volunteering psychologists is dedicated to bringing scientific insights closer to the wider community and fostering a healthy, open dialogue on important mental health topics.
